

Need Help Putting Together the Pieces of your PPM Solution?

Annitek, based in Princeton, New Jersey, has been providing expert Clarity (NIKU) support to both CA and CA Clarity PPM customers throughout North America for more than five years. Our CA Clarity PPM consultants and trainers have extensive hands on experience with the architecture, functionality, and technology of CA Clarity PPM.

Annitek is a **CA Clarity PPM Enterprise Solutions Provider (ESP)** and a **CA Clarity PPM Education Partner**. CA's ESP program is an exclusive designation within the CA Partner Program, designed for high-end CA Clarity PPM Solution Providers, VARS, and consultants with deep technical and consulting skills that deliver value around CA Clarity PPM. CA Clarity PPM ESPs are authorized by CA to sell and support the product suite to organizations with 1,000 + employees. As CA Education Partners we are authorized to resell CA Clarity PPM Education and deliver CA authorized courseware with CA Clarity PPM Certified Trainers. In these roles, Annitek assists both current and prospective CA Clarity PPM customers throughout North America by:

- Providing Proof of Concept and customer environment assessments.
- Installing, migrating, upgrading, and project managing CA Clarity PPM implementations.
- Providing Reporting for Clarity expertise: Custom Universes, Infoview Reporting.
- Creating Xcelcius Dashboards.
- Staffing CA Clarity PPM implementation engagements.
- Turning around failed, stalled, or troubled implementations.
- Getting customers up and running on CAPA, & developing customized CAPA Content.
- Developing & delivering custom training, and providing highly effective 1:1 mentoring.

The CA Clarity PPM Experts at Annitek are committed to your success. We strive for excellence in all of our engagements. Our CA Clarity PPM consultants are consistently the best in the industry. This is due in part to a management team comprised of seasoned consultants who have worked on CA Clarity PPM projects throughout the world, and who strongly believe in a “hands-on” approach. Each Annitek CA Clarity PPM Expert selected to work on your project must meet our own strict qualifications: a minimum of 6 years industry experience working with Fortune 500 clients; a minimum four years of CA Clarity PPM expertise, with several implementations at different clients; understanding of business processes and technology; proven track record of success; superior communication and interpersonal skills; and commitment to the Customer’s success.

Annitek’s CA Clarity PPM consultants make a difference because:

- Highly skilled consultants with proven track records mean your project will be in safe hands.
- Functional expertise means a valuable and relevant business solution is delivered, not just a technology solution.
- Previous implementation experience helps to highlight and resolve challenges arising on your project more effectively.
- Your success directly correlates to Annitek’s success, and each Annitek Consultant assigned to your project is committed to your goals.

Let Annitek provide the missing piece to your CA Clarity PPM puzzle! Meet the Annitek Team at CA World 2010, Booth 443.
